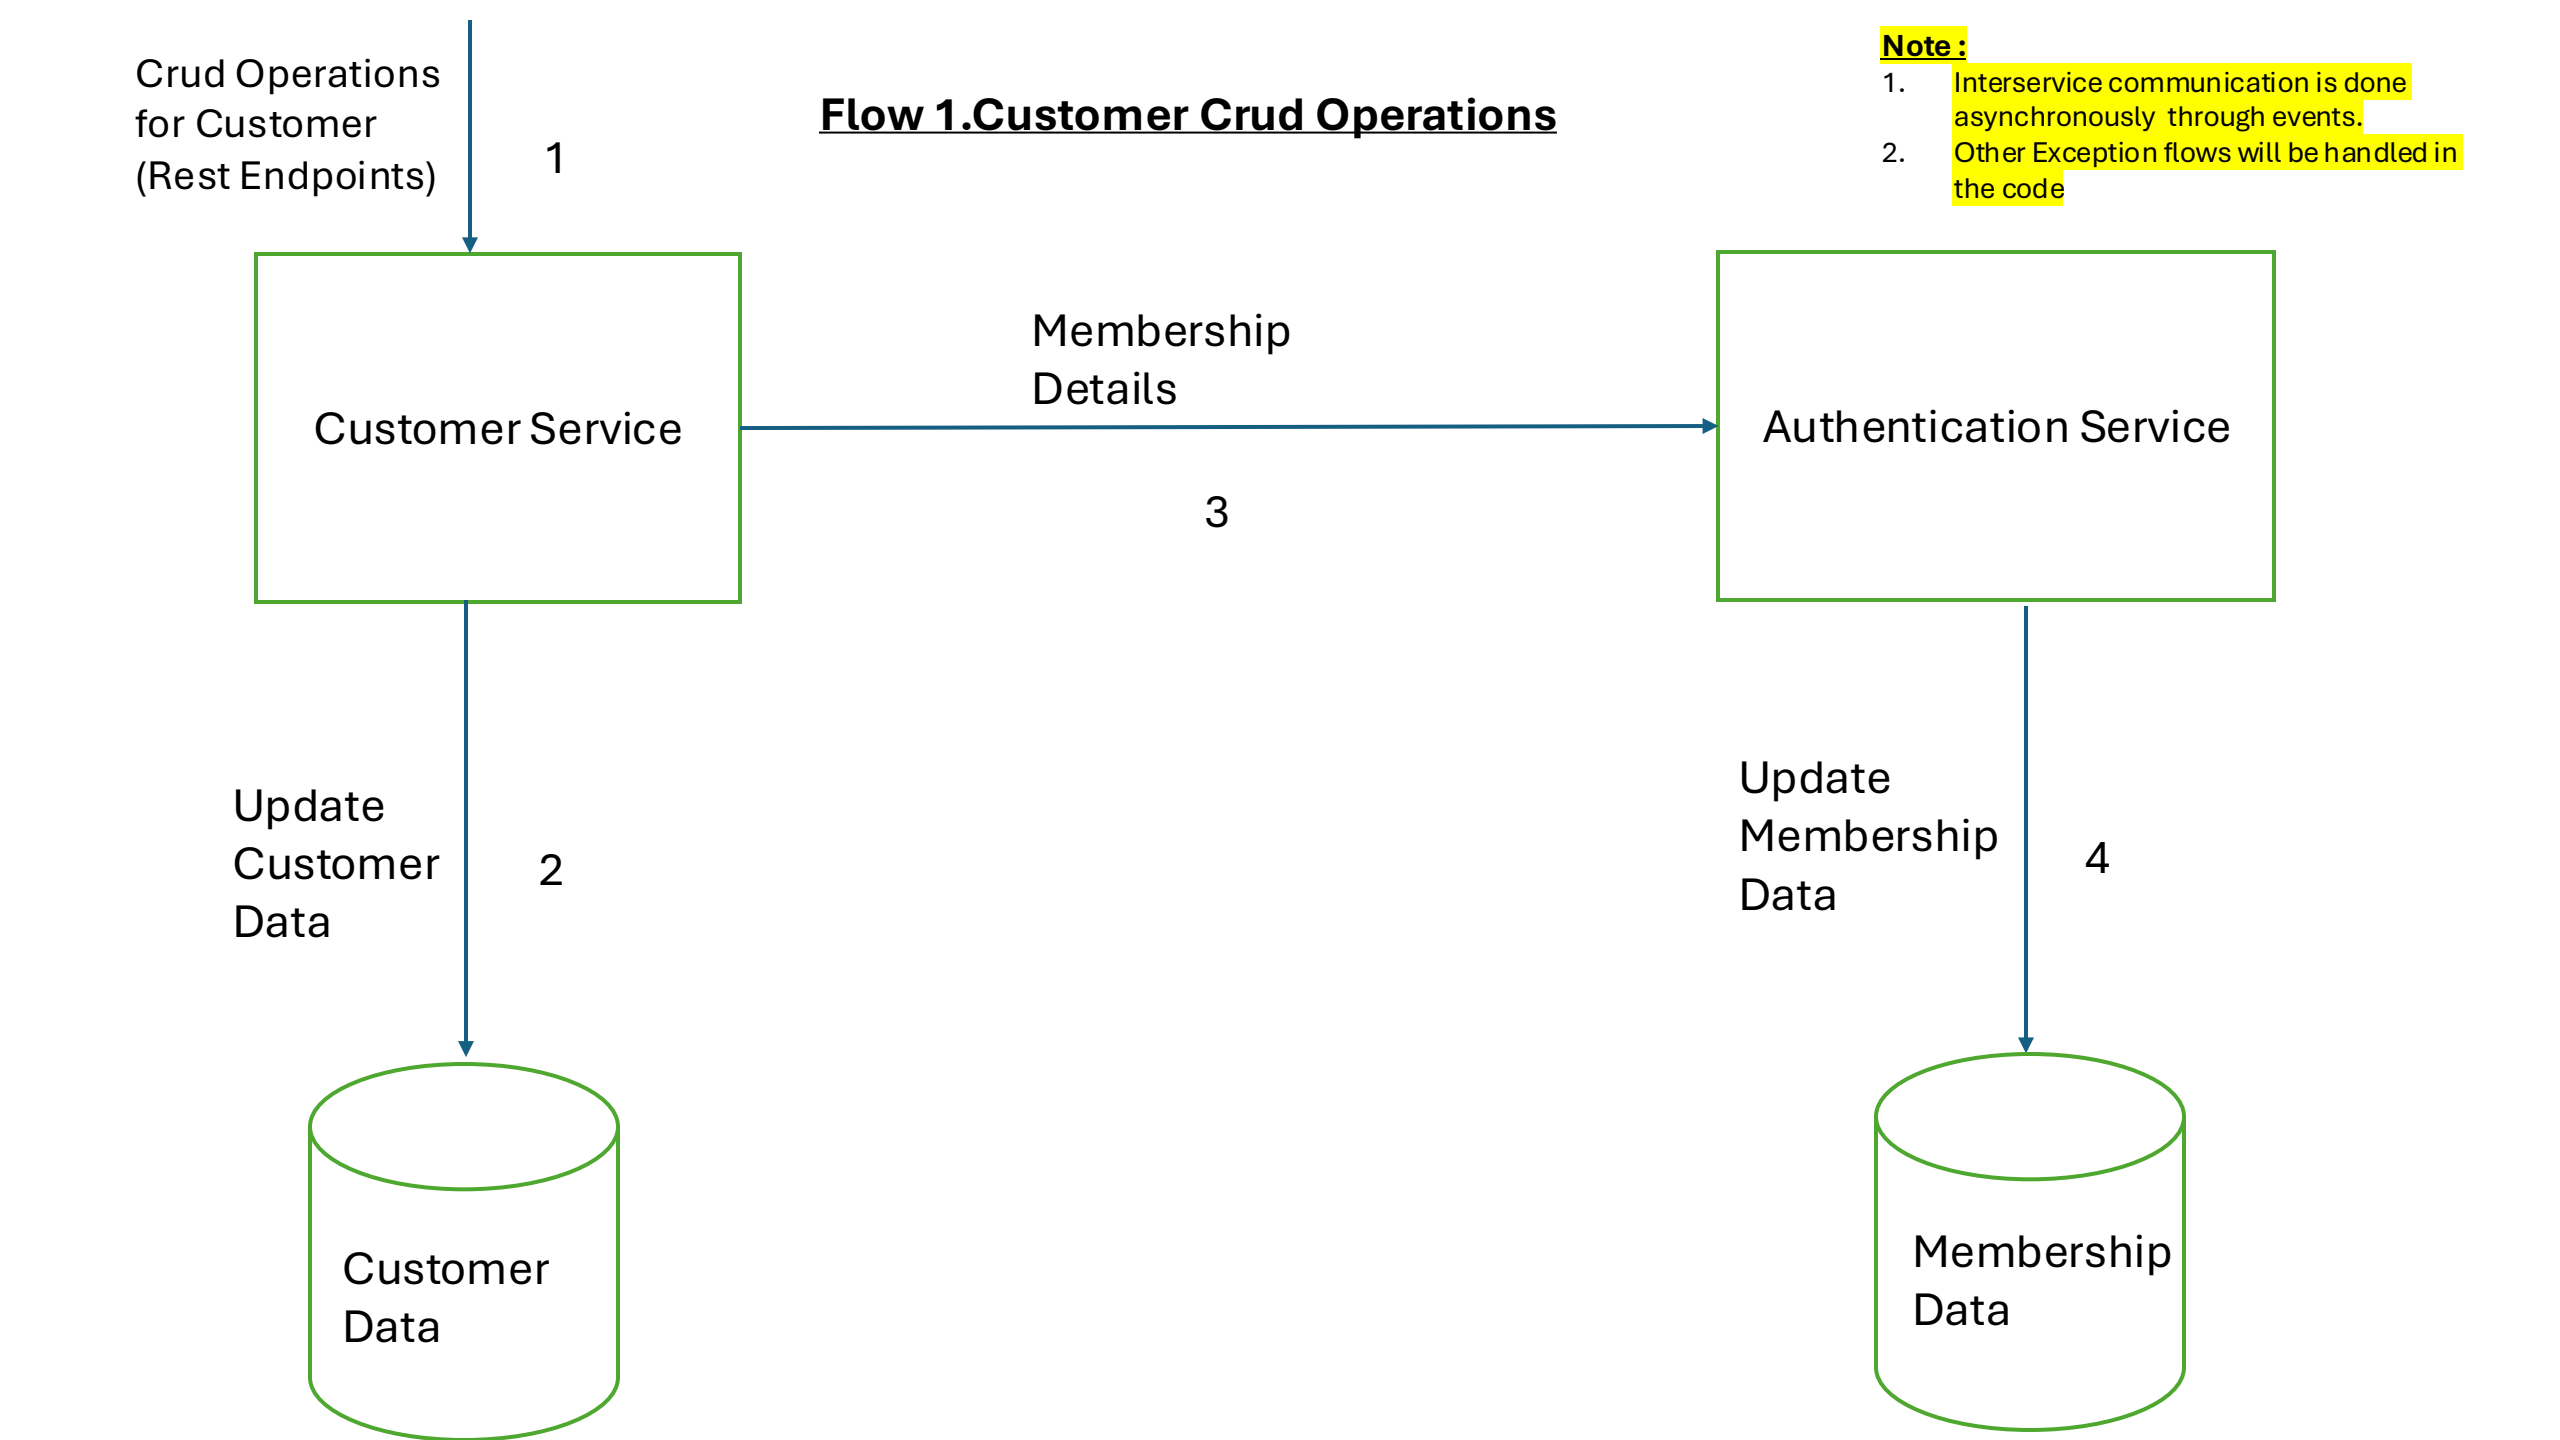
Solution Design

I have added two flows for the solution. Below they are :

1. Customer Crud Operations flow
2. Add messages to timeline flow.



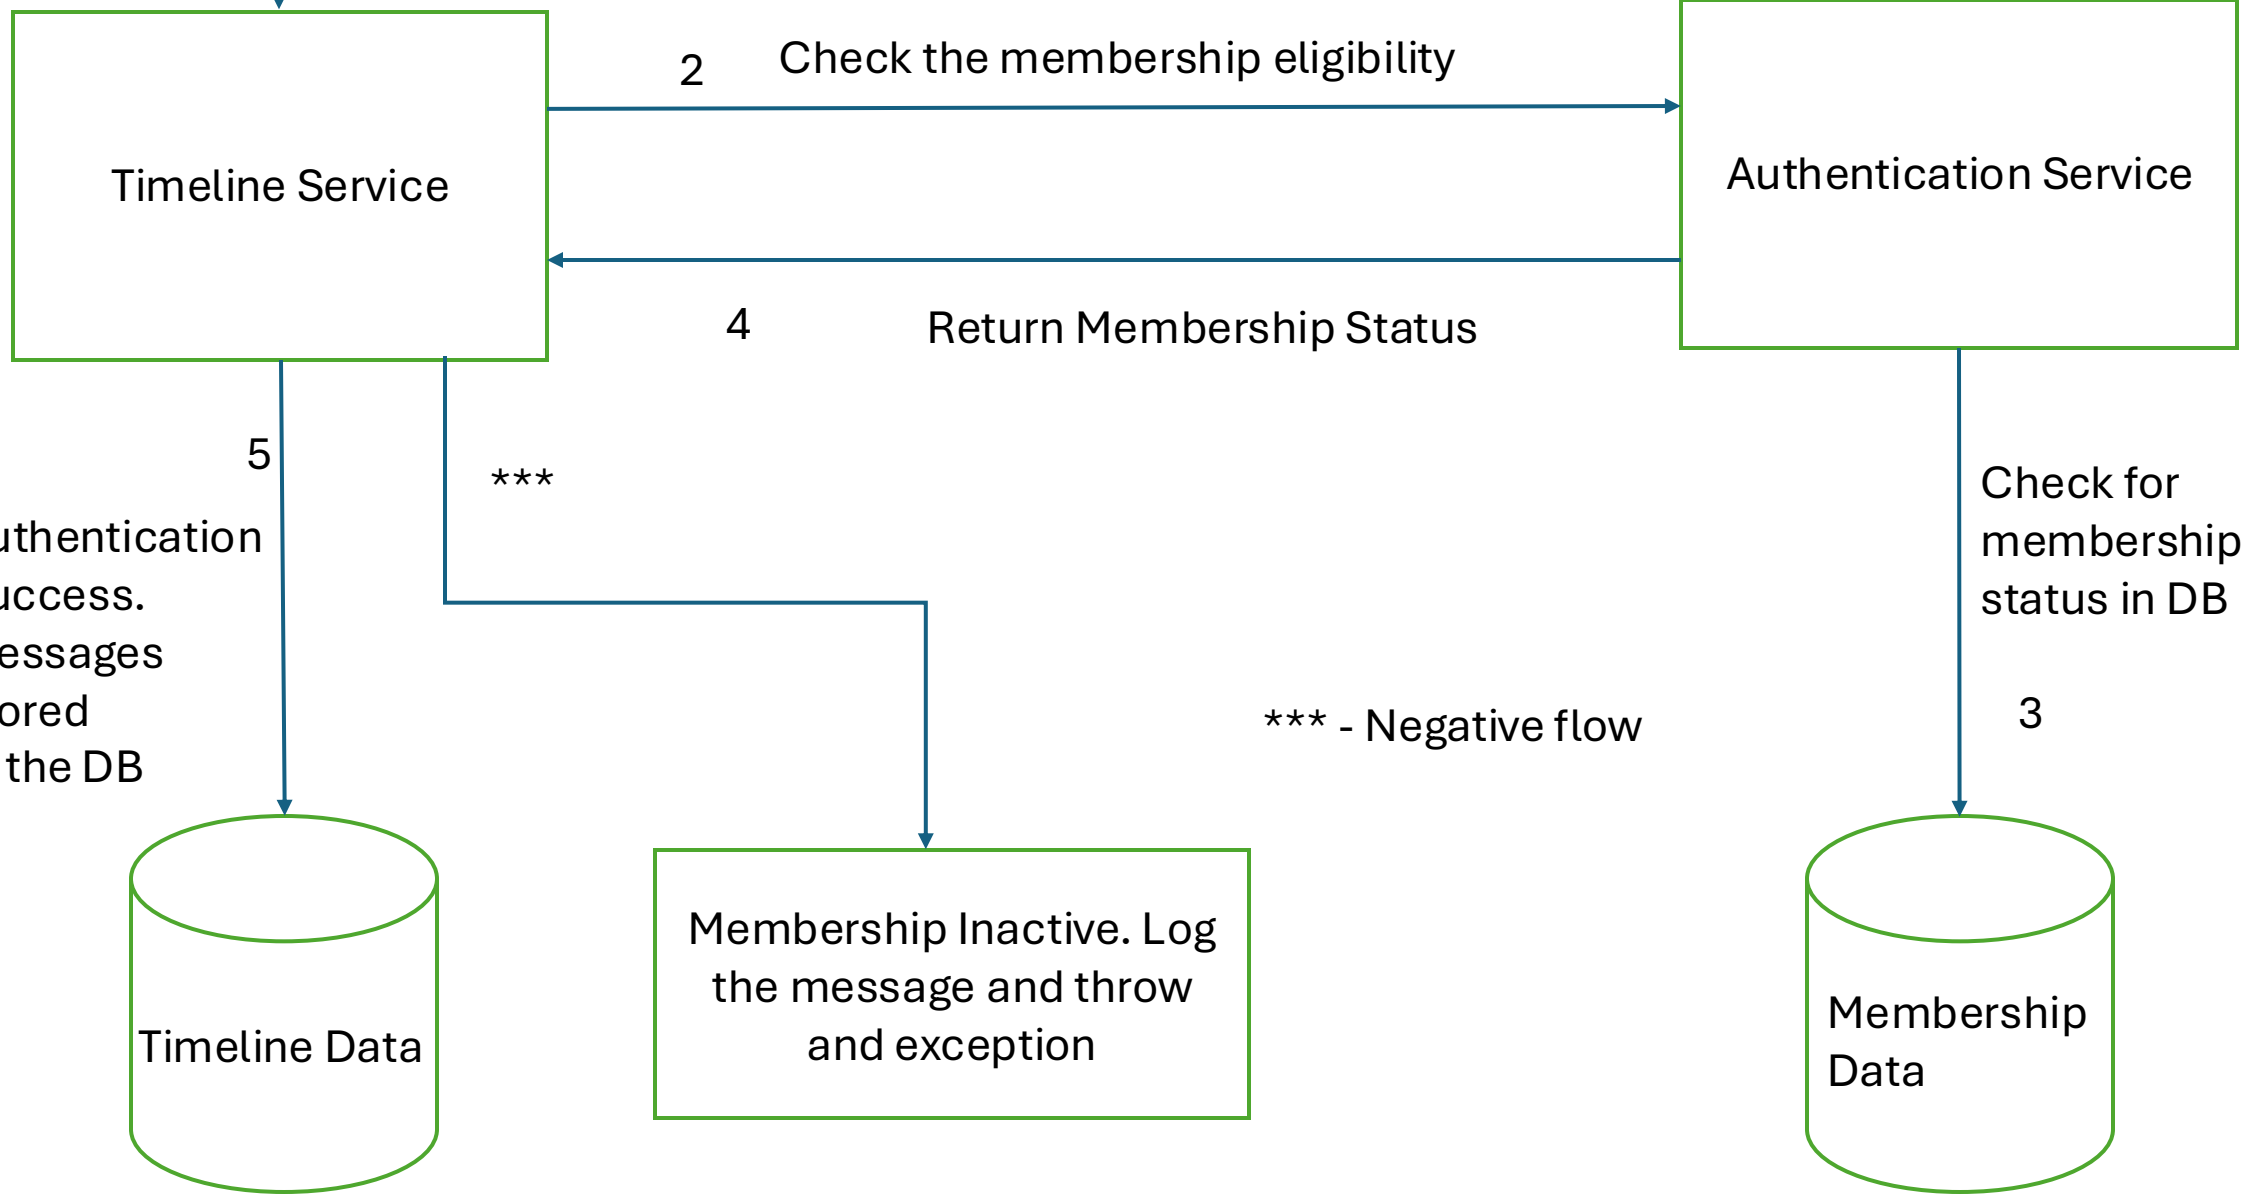
Crud Operations for Customer (Rest Endpoints)
1
Flow 1.Customer Crud Operations
Note :
1. Interservice communication is done asynchronously through events.
2. Other Exception flows will be handled in the code
Customer Service
Membership Details
3
Authentication Service
Update Customer Data
2
Update Membership Data
4
Customer Data
Membership Data

Rest Endpoint

/timeline
/postMessage

1

Flow 2. Post messges to timeline

Note :


1. Interservice communication is done asynchronously through events.
2. Other Exception flows will be handled in the code
